

# Making a prototype

In order to see if your idea works, you'll probably want to make a prototype. It really doesn't need to be fancy! Paper and cardboard are absolutely fine. Here are some examples, just to get you thinking.

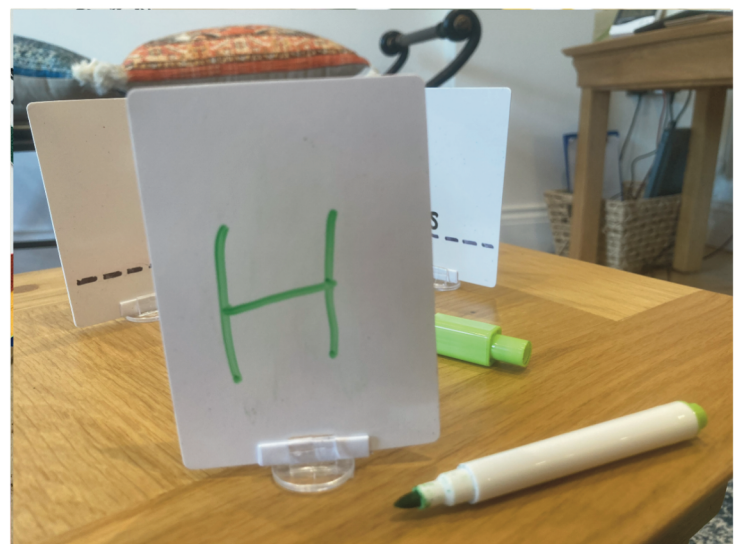

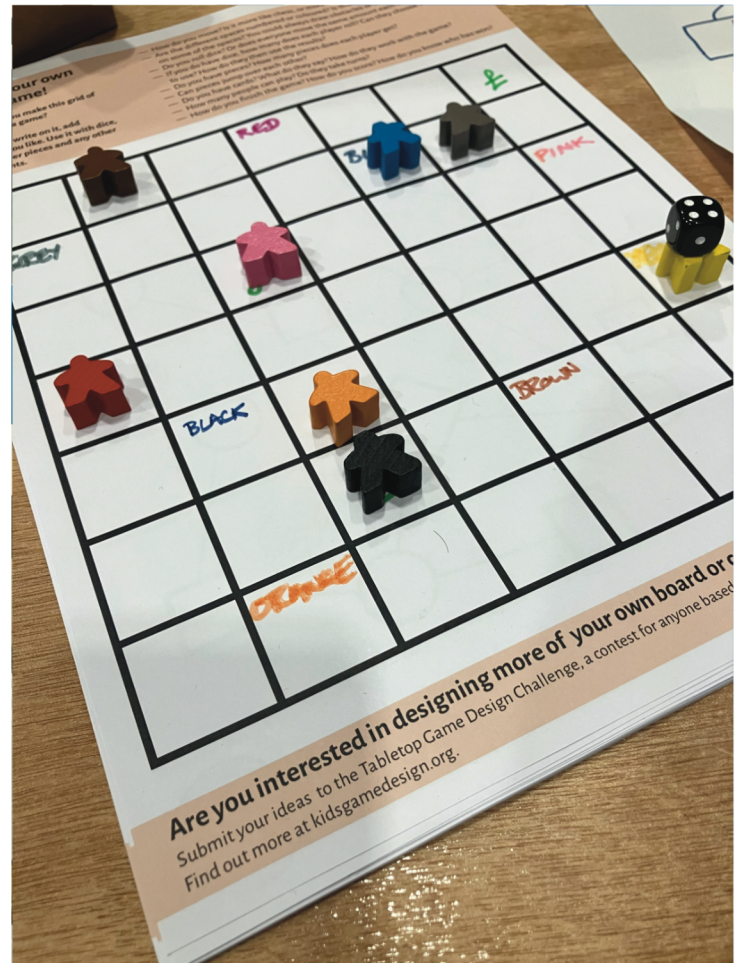

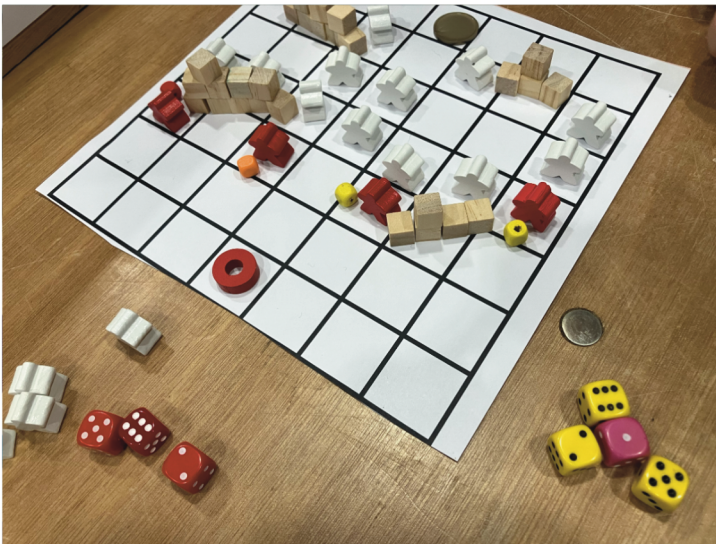

**Are you interested in designing more of your own board or card games?**

Submit your ideas to the Tabletop Game Design Challenge, a contest for anyone based in the UK and aged 7-16. Find out more at [kidsgamedesign.org](http://kidsgamedesign.org).
